2. Tactics: the same team with and without the ball

A formation is not one shape. Teams change shape with the ball, and how they press and how they behave in the seconds after winning or losing it depends on the shape they start from. Each team below is shown in six shapes: its nominal formation and the five working phases. The drawings are schematics, attacking left to right.

Harbour City: 4-3-3

Front three, one pivot, two eights.

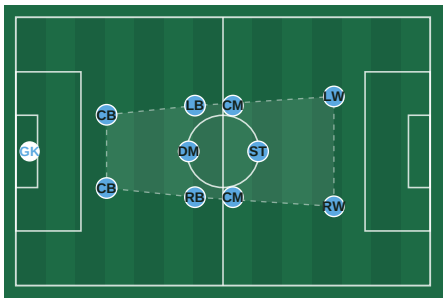

Nominal nominal

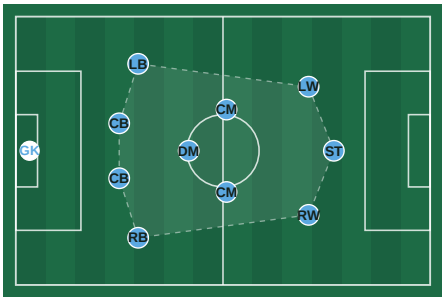

Build-up 4-1-2-3

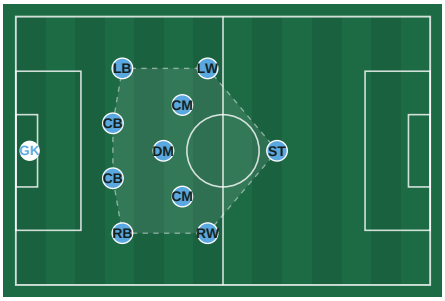

Settled attack 2-3-5

Press 4-3-3

Mid block 4-5-1

Low block compact

Rest defence. While the team attacks, CB CB DM stay behind the ball as cover against a counter.

Time in each phase

Phase	Share	Entered	Line height	Length	Width	What usually sets it off

Mid block	5%	30	52 m	38 m	38 m	the ball is beyond the press line (30)
Low block	0%	0	n/a	n/a	n/a	n/a

The five phases

Build-up. The team has the ball in its own third. The centre-backs split, the pivot drops, the fullbacks and forwards hold their width and the team tries to play out under pressure.

Settled attack. The ball is past the first phase. Fullbacks and wing-backs push on, wide players come inside, and the team sets up for the final third while a few players stay back as cover against a counter.

Press. The other team has the ball in the zone where this team is willing to press. The front line steps up and angles its runs to cut passing lanes; the rest of the team squeezes up behind.

Mid block. The team defends in a compact shape with the ball beyond its press line. It keeps its lines close and waits for the pass that triggers the press.

Low block. The team defends deep: the ball is in its own third, or it is protecting a lead late on. Short, narrow and close to goal, it gives up possession to protect the box.

3. Every position, and who played it

4. The analytics, view by view

Shots and expected goals

Every shot, sized by expected goals (xG: the chance a shot of that kind, from there, becomes a goal). Post-shot xG (xGOT) also uses where in the goal mouth it went, so it separates a good finish from a good chance.

	Harbour	Northbridge
Shots	24	9
On target	4	4
Goals	1	2
Expected goals (xG)	1.38	1.04
Post-shot xG (xGOT)	0.44	1.51
Big chances	0	1

The best chance was Callum Roweov's (Northbridge, 40'), worth 0.44 xG and scored.

Shot map: both teams are drawn attacking the right-hand goal. Bigger circle, bigger chance; a solid circle is a goal (3 in this match).

Possession value: the actions that mattered

Possession value gives every pass, carry and shot a score: the change in the chance the team scores minus the chance it concedes within the next few actions. It finds the actions that mattered, including ones that never become an assist.

Minute	Player	Team	Action	Value
41'	Mateo Calelham	Harbour	pass	+0.807
40'	Callum Roweov	Northbridge	shot	+0.675
80'	Omar Pelwick	Northbridge	pass	+0.464
80'	Dario Vasworth	Harbour	shot	+0.404
58'	Mateo Landal	Northbridge	save	+0.284
58'	Theo Lanez	Harbour	shot	+0.265

Most valuable players: Mateo Calelham (+1.37), Mateo Landal (+0.90), Callum Roweov (+0.76), Adrian Norarado (+0.64), Dario Vasworth (+0.42).

Space and pitch control

Pitch control is who would reach each part of the pitch first, from where the players are standing. Control share is the share of the pitch a team controls; the block area is the size of the shape its ten outfield players make while defending.

	Harbour	Northbridge
Pitch control share	56%	44%
Final-third control	20%	9%
Defensive block area (m2)	961	894
Space behind the line (m2)	82	51

Packing and line-breaking passes

Packing counts the opponents a forward pass takes out of the game; a line-breaking pass goes through a defensive line rather than around it.

	Harbour	Northbridge
Completed forward passes counted	560	467
Opponents bypassed (packing)	933	682
Passes through a line	186	134
Passes through all three lines	0	0

The most damaging pass: Mateo Landal to Hugo Doraford at 71' took 10 opponents out of the game and broke 1 line.

Passing networks

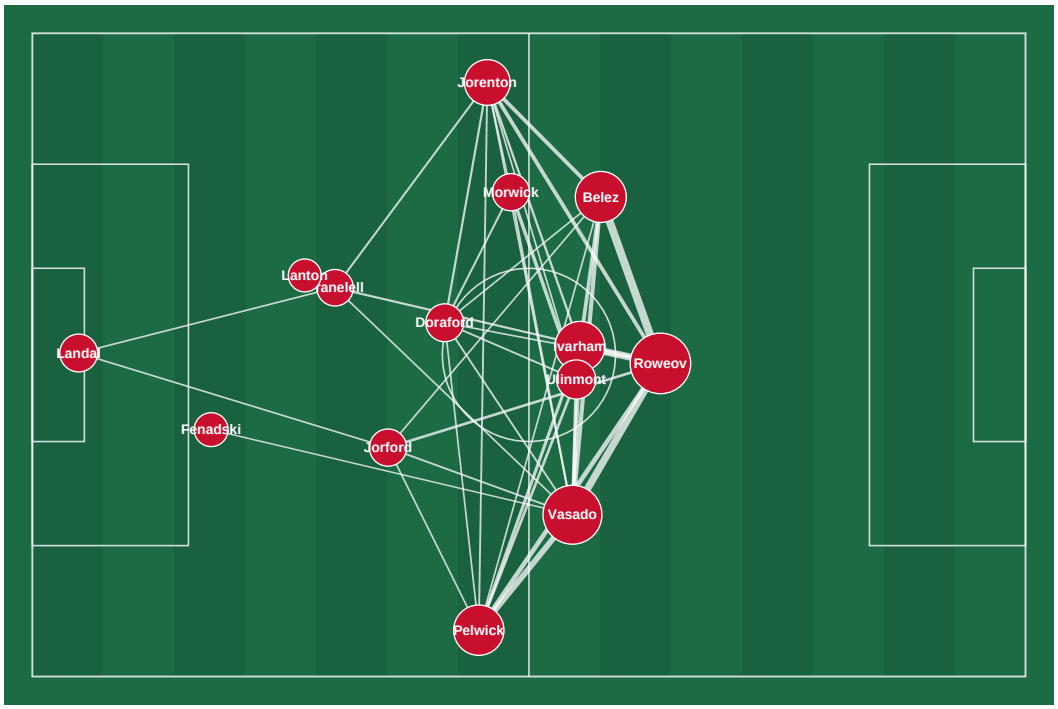

Each player sits at the average place he passed from; a line joins two players for each completed pass between them, and thicker means more.

Harbour City

560 completed passes, average length 20.1 m, average position 49 m from the own goal. The strongest link is Dani Lorenard and Theo Lanez (66 passes).

Northbridge Athletic

467 completed passes, average length 19.8 m, average position 44 m from the own goal. The strongest link is Eren Belez and Callum Roweov (43 passes).

Off-ball runs

Off-ball runs seen in the tracking: running in behind the defence, an overlap by a fullback, and a forward dropping into midfield. 'Ball played' says whether the run was found.

Run	Harbour	Northbridge
In behind	2 (0 found)	10 (5 found)
Overlap	0 (0 found)	6 (0 found)
Drop into midfield	52 (14 found)	17 (5 found)

Physical load

Distance covered, high-speed running (above 19.8 km/h), sprint distance (above 25 km/h) and accelerations. The fatigue index compares high-speed running in the last half hour with the first fifteen minutes.

Player	Team	Distance km	High speed m	Sprint m	Accelerations
Ilya Vasado	Northbridge	15.0	2195	179	206
Callum Roweov	Northbridge	12.3	2098	346	224

Eren Belez	Northbridge	12.6	1714	106	179
Elias Pranelell	Northbridge	13.2	789	223	117

Transitions and pressing

What happens in the seconds after the ball changes hands: how often the team wins it straight back (counter-press), turns the ball over high up the pitch, and breaks quickly for a shot.

	Harbour	Northbridge
Possessions lost	55	59
Won back within 5 s	11	8
Counter-press success	20%	14%
High turnovers	3	2
Shots from high turnovers	1	1
Fast breaks	2	4
Fast-break xG	0.05	0.66

PPDA is passes the opponent makes per defensive action of the pressing team, so a lower number means a harder press. It is shown by zone of the pitch, with what set each press off.

	Harbour	Northbridge
Pressures	174	125
PPDA, opponent's third	21.2	27.2
PPDA, middle third	9.0	27.6
PPDA, own third	6.7	31.8
Press set off by a back pass	18%	37%
Press set off by a poor pass	17%	9%
Press set off by something else	66%	54%

Set pieces

Shots and expected goals that come from each kind of corner, free kick and goal kick, and how the team defends corners.

Team	Kind	Routine	Taken	Shots	xG	Goals
Harbour	goal kick	short	6	0	0.00	0
Harbour	goal kick	long	1	0	0.00	0
Harbour	corner	near	1	0	0.00	0

Northbridge	free kick	direct	1	0	0.00	0
Northbridge	corner	far	2	1	0.17	0

Corner defence: Harbour zonal, Northbridge man.

Goalkeepers

Goals prevented is the post-shot xG a keeper faced minus the goals he conceded: above zero means he saved more than an average keeper would.

Keeper	Faced	Saves	Conceded	xGOT faced	Prevented	Claims	Pass %
Adrian Norarado (Harbour)	9	2	2	1.51	-0.49	0	100%
Mateo Landal (Northbridge)	24	3	1	0.44	-0.56	0	57%

Season context and prediction

The league's simulated history: where each club stands, its form, and a Poisson-model prediction of the result from each side's expected goals for and against.

Pos	Club	P	W	D	L	GF	GA	GD	Pts	Form
1	Northbridge Athletic	4	4	0	0	11	0	+11	12	W W W W W

Earlier meetings: Harbour 0-1 Northbridge (round 5); Northbridge 2-1 Harbour (round 10).

5. Every player

Impact combines possession value with goals and assists. Packing and line breaks count forward passes that took opponents out of the game; xG and xA are expected goals and expected assists from the player's shots and key passes.

6. All nine formations compared

How the formations the simulator knows differ in each phase. Numbers read from the deepest line to the front; the last column lists who stays back as cover when the team attacks. The two formations played in this match are in bold.

Formation	Idea	Build-up	Attack	Press	Block	Rest defence
3-4-2-1	back three, two tens in the half-spaces	3-4-2-1	3-2-4-1	3-4-2-1	5-4-1	CB CB CB
3-4-3	back three, wing-backs, a front three	3-4-3	3-2-5	3-4-3	5-4-1	CB CB CB
3-5-2	three centre-backs, wing-backs, two strikers	3-1-4-2	3-3-4	3-5-2	5-3-2	CB CB CB DM
4-1-4-1	a lone holding midfielder screening the back four	4-1-4-1	2-3-5	4-1-4-1	4-5-1	CB CB DM
4-2-3-1	double pivot, a ten behind one striker	4-2-3-1	2-4-4	4-4-2	4-4-1-1	CB CB DM DM
4-3-1-2	a midfield diamond and two strikers	4-1-2-1-2	2-3-3-2	4-3-1-2	4-3-1-2	CB CB DM
4-3-3	front three, one pivot, two eights	4-1-2-3	2-3-5	4-3-3	4-5-1	CB CB DM
4-4-2	two banks of four, a strike pair	4-4-2	2-4-4	4-4-2	4-4-2	CB CB
5-3-2	a back five and a counter-attacking pair	3-1-4-2	3-3-4	5-3-2	5-3-2	CB CB CB DM

Club tags change these shapes: a lone pivot that drops makes the build-up a back three, inverted fullbacks narrow it, a false nine drops the front line into midfield, and a back-three side presses and defends with its wing-backs dropping in.

Press schemes and transitions

- **Press scheme: zonal.** The team presses by zone: it holds a shape and closes the ball down when it enters the zone.
- **Press scheme: wide_trap.** The team presses with a trap: it closes from the inside to steer the ball to the touchline, then jumps on it with one more player.
- **Press scheme: man.** The team presses man for man: each player picks up a nearby opponent as well as pressing the ball.
- **On loss: counterpress.** The team counter-presses: it swarms the ball for about five seconds after losing it.
- **On loss: regroup.** The team regroups: it contains for two seconds, then drops back into shape.
- **On win: counter.** The team breaks at once after winning the ball.
- **On win: keep.** The team keeps its shape and builds after winning the ball.

7. What to trust

- All data is synthetic: the league, clubs, crests and players are fictional, and the matches are simulated at 5 Hz.
- Numbers are computed by code from events and tracking; no number in this report was written or estimated by a language model.
- Win probability, possession value and post-shot xG are fitted on simulated matches, so the ranking of actions and players is meaningful but the absolute values belong to the simulator, not to real football.
- Pitch control uses a simplified time-to-reach model (7 m/s, no velocity or ball), so read it as 'who is closer', not as a physical prediction.
- Shapes drawn in the tactics section are schematics: depth is an ordering between a team's back and front lines, not a measurement. The measured line height, length and width are averages over the time the team spent in each phase.
- Formations measured from tracking agree with the designed back-line count in about 85% of cases and with the exact label in about 39%; treat the measured label as 'what the average positions say'.

The win-probability model

Goals follow a Poisson process at a league rate of 0.0157 per team-minute over 95.8 minutes, blended with the match's own expected goals as if the prior were 30 minutes of evidence. A red card multiplies the ten-man side's scoring rate by 0.78 and the other side's by 1.22; those two are priors, not fitted. Penalties count as goals but not as expected-goals evidence.

Where the numbers come from

Events and tracking come from the 5 Hz simulator (or any feed in the same format). Code derives every metric; the report is assembled from the replay package and contains no model-written text. The same package drives the match center, the MCP tools and the on-screen graphics, so a number here matches the number there.
